Market Value Adjustment

Any amount withdrawn in excess of the remaining free withdrawal amount is subject to a CDSC and MVA, if applicable. The MVA is an adjustment that may be applied if you make a partial withdrawal or fully surrender your contract before the end of the CDSC period. The MVA may be positive, negative or zero. If the MVA is negative, it could decrease the amount that you receive when you take a withdrawal or surrender. Conversely, if the MVA is positive, it could increase the amount you receive.
